Radiators

Digital Recording

Technical Challenges

Room Changes

Each evening, most rooms were re-configured for the following day's events. Requiring two teams, one doing the changeovers and the other team fresh to start early the next day.

163 Microphones

163 microphones in a single room, is a challenge in itself, but then add 11 dome cameras and the programming of all of these and having the whole thing integrate together was a big challenge. It all worked perfectly on the day.

Large Quantities of Receivers & Radiators

2900 Receivers is a large quantity, so we called on our Congress Rental Network Partners to help us with additional receivers & Radiators to support this event.
